

COPPER AND BRONZE

Although ten thousand years have elapsed since we started using it, copper has not ceased to stimulate our optical intelligence with its pink tones and metal finish. Bronze, on the other hand, remains as appealing as it was four thousand years ago, when it was initially alloyed by mixing copper with tin following the discovery of copper smelting.

As colors, the distinction between copper and bronze is rather uneasy because they both contain definite tones of yellow, orange and red, albeit in different proportions. As finishes, copper and bronze sport natural earthy mineral shades with attractive metal shine and spark. Metals and minerals have always been considered of high value and pleasing to the eye.

The use of metal and mineral earthy tones propels us back into ancient times and the homecoming to nature. Because we can manage the shine and spark, the development of copper and bronze effect finishes immerses us into an ocean of shimmery, polished or brushed pearlescent and metallic effects linking us to ten thousand years of history.

MAYA

TIGER Drylac® product ID 49/95381

Inspired by polished copper, MAYA is a mysterious dark aubergine finish with a bluish starry flicker. The sparkling, almost invisible, bluish metallic effect stages us under a dark summer night with millions of stars revealing the beauty of the firmament. MAYA is elegant providing an impression of an almost velvety surface. It will add charm and thrill to light fixtures, balustrades, benches and other everyday use objects.

NAVAJO

TIGER Drylac® product ID 49/95361

Serious yet vibrant, inspired by brushed copper, NAVAJO is a stylish, brownish reddish earthy finish displaying a much muted shine. The countless special effect bonded pigments that bleed through the surface create the illusion of a sandy beach blazing by the sunset rays on a hot summer day where the scent of the ocean tantalizes other senses. NAVAJO is suitable to recreate old copper finishes with a modern twist.

ORION

TIGER Drylac® product ID 49/95612

Inspired by gilded bronze, ORION is a botanical brown with gold undertones and a low shine. It is the perfect coating to recreate mid-nineteenth century gilded bronze finishes that were usually produced for royalty and are now housed in museums. ORION is ideal to re-establish period light fixtures and furniture and drape an interior with scents from the past.

Used as a set or independently, MAYA, NAVAJO and ORION form an earthy palette of modern bronze and coppers with period tendencies and a high definition character to generate a cozy enthused natural atmosphere.

MAYA, NAVAJO and ORION are powder coating finishes from the Natives and Aliens; a color selection formulated to support the contemporary designer in achieving further freedom of expression in design.

Series 49 is a polyester TGIC weather resistant powder coating for interior and exterior applications.

Due to digital reproduction, discrepancies between the colors displayed and the actual powder coating should be expected. For an accurate color and finish assessment, it is recommended to obtain a powder coated sample panel.

To request a sample panel of MAYA, NAVAJO or ORION contact a TIGER Drylac
